COMPACT LASER BRIDGE

COMPACT LASER

L A S E R B R I D G E

- Standard size 6 m with possibility of different sizes
- Can be applied to any embroidery machine
- Area for cutting and engraving 300*300mm
- Laser tube 70 watts
- Spot size 290 micrometers
- The head moves through an aluminium structure guide. It is controlled by a servo motor and stops just in front of each embroidery head to perform the corresponding cutting or engraving process.
- This moving head receives support from a positioning and operating program which allows it to work with one or several embroidery machines depending on the Project.
- Includes PC and software in order to control the laser
- Meets CE regulation standards for these machines.
- Cutting by elimination of material

Electric Power:	3000w 12A 220v 1ph 50/60 Hz
Weight:	360 Kg
Working Area:	300*300 mm
Fume extraction:	Included
Galvo mark/cutting speed:	Up to 2000 mm/s
Head speed:	Up to 2000 mm/s
Profile precisión:	+/- 0.038 mm
System repetibility:	+/- 0.013 mm
